

NEW FOUNDATIONS® RACK MOUNTED POWER CONDITIONER

MODEL CAPC01

Safeguard components and easily monitor power usage with multi-mode LED display

Protecting valuable audio video equipment is easy with Sanus' new CAPC01 Rack Mounted Power Conditioner. It mounts to Sanus Foundations Component Series AV racks for the easiest solution to power surge protection — even for the most complex rack systems. It features 11 fast-acting 2,400-Joule protected outlets and dual-stage EMI/RFI filters for superior-quality power signals. A multi-mode LED display makes it easy to monitor power usage and clearly indicates voltage, amps and power consumption. Another great feature is the adjustable, dual pullout LED light dimmers that illuminate equipment inside the rack. The CAPC01 also includes a guaranteed \$50,000 connected equipment warranty against damages, so you can feel confident your equipment is well protected.

CAPC01 shown

11 fast-acting 2,400-Joule protected outlets protect valuable audio and visual gear from spikes and surges

Multi-mode LED display clearly indicates voltage, amps and power consumption to help monitor power usage

Adjustable, dual pull-out LED light dimmers illuminate equipment inside your rack

Dual-stage EMI/RFI filters eliminate noise up to 30 dB (100kHz–1MHz)

Includes a guaranteed \$50,000 connected equipment warranty against damages

Electric specification:
12A max / 125V / 60Hz / 1500 W
