

TV TIP-OVERS ARE A GROWING THREAT

The statistics are real. Thousands of people are injured every year from TV tip-overs. Alarming, most of these injuries happen to children younger than five years old.

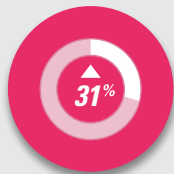

Research indicates a child is rushed to the emergency room every 45 minutes in the United States, which is less time than it takes to watch an episode of Sesame Street.¹ As the statistics below show, tipping TVs are a big problem that is only getting worse.²

17,000 injuries associated with TV instability were reported in 2011 alone

A child is killed every three weeks due to a tipping TV

Injuries from TV instability increased by 31% in the last ten years

WHY DO TIP-OVERS HAPPEN?

Today's flat-panel TVs are tall and thin making them susceptible to tipping off furniture when bumped or moved. Tipping TVs can cause property damage, personal injury or even death. The good news is these all-too-often tip-over incidents are easily **preventable** with the proper equipment.

EVERY FLAT-PANEL TV SHOULD BE SECURED

Mounting your flat-panel TV is a safe and secure way to avoid injury. With a wide variety of SANUS TV wall mounts available, you're sure to find the perfect mount for your TV and lifestyle.

If wall mounting isn't an option for you, at the very least consider a SANUS TV safety strap or furniture mount system (FMS).

Don't become a statistic. Secure your TV for safety today.

TAKE ACTION TODAY

The SANUS MountFinder™ makes it quick and easy to find a compatible mount for your TV.

Step

1

Go online to www.sanus.com

Step

2

Enter your TV make and model

Step

3

Select a mount from the results given

SANUS MountFinder™

SCAN HERE OR VISIT SANUS.COM for instant access to the SANUS MountFinder™ tool to find the perfect mount for your TV.

ABOUT TVSAFETY.ORG
