

NEW SANUS® ELEMENTS™ SUPER SLIM HDMI CABLES

MODEL ELM4303

MODEL ELM4306

MODEL ELM4308

The Perfect HDMI Cable for Mounted TVs

New to the SANUS Elements™ line, the HDMI Super Slim cables perform just like thicker cables, yet their ultra-flexible design enables easy bending for connections in tight spaces. Featuring connectors that are 40% shorter than standard HDMI cables, the SANUS Super Slim cables allow ultra-thin TVs to sit almost flush with the wall. The cables are 3D-compatible and offer high-speed Internet connectivity — no need for a separate Ethernet cable. With the ability to support video resolutions beyond 1080p as well as 10, 12 and 16-bit color, the new HDMI cables will work with next-generation displays. The super slim cables also support audio return channel, allowing TVs to return audio to an AV receiver or other audio controllers.

ELM4306 shown

Connector is 40% shorter than conventional HDMI cables for easy installation behind ultra-thin TVs

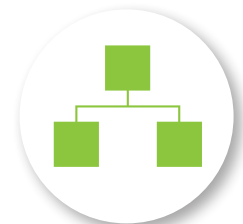

Supports 10-bit, 12-bit and 16-bit color depths for deeper, more accurate colors

Works with 3D TVs and components

Handles video resolution 1080p and beyond for next generation displays

Delivers high-speed Internet connectivity to compatible devices, eliminating the need for a separate Ethernet cable

Ultra-flexible cable allows for easy bending to make connections in tight spaces
